

Recruiting Frontend Developer

Who are we?

Codax is a startup in the digital sector expert in the field of connectivity and interoperability of IoT solutions. Our software responds to the pain of developers that during their work have to face countless amounts of different protocols to work with. With our solution, any kind of machinery or device gets accessible through a few simple steps. The platform allows customers to collect data and interact with the devices / machineries on a secure connection out-of-the-box. Due to the high interest and demand, we are searching for interest people that can support us with the development of the user interfaces.

Team

The Team is composed of two-person. The CTO is responsible for the technical consultancy with clients, the full-stack development of the platform and the management of available resources. The business developer is responsible for the generation of new customer channels and set up agreements for the implementation of the solution.

We are searching for

The figure that we are looking for is that of a frontend developer with knowledge in the field of UI design, by taking into consideration the new paradigms enabled by IoT solutions. The candidate will be in charge of designing new services and interactions with objects and to realize them.

Priority will be given to candidates that have experience in working with Web and Mobile interfaces (Android and iOS), but also UI based on voice assistants (Google, Alexa and Siri). Moreover, the person will be in charge of exploring new tools and frameworks for the optimization of the User experience within the platform itself.

Nice to have

Entrepreneurial mindset to shape the vision together. Experience in the predictive maintenance industry and Statistik know-how is from an advantage.

What we offer

The current situation showed us that remote working is more than possible so you are free to choose from where to work. You can work from home, some other nice place around the globe or join us in the headquarter in Bolzano, where we are located in the incubation centre NOI- Techpark. Furthermore, we are extremely flexible about working hours or circumstances, as a startup, we make the experience of daily change so as long as the work gets done everything is fine!

We are of the strong belief that everyone who is willing to join us on the journey and wants to invest his time and effort in the project should get his own little part of the pie.

You are interested and looking for an opportunity to learn and engage with a new project in the start-up scene and digitalization sector? Don't hesitate to contact us at any point!
