

# Technical Co-Founder (Mechanical Engineer)

Bozen / Remote-first / Hybrid / Early Stage / Equity

Holevio is developing a hardware product for the household that changes how we handle food at home. The starting point is a system for targeted CO<sub>2</sub> injection into food containers (“Airswapping”) that significantly extends shelf life, with the aim of establishing Airswapping as an innovative approach to food preservation at home. Less waste, longer freshness, less mold on food, and a smarter way to handle food overall, that is what drives Holevio. The project is currently being built as a solo startup, with the goal of assembling a strong, motivated, and collaborative team.

## Status

- NOI Techpark Pre-Incubation Program
- Concept defined and initial validation completed
- Building product, brand (Holevio), and category (Airswapping)
- MVP in development (target: 4–6 weeks)

## Profile

- Background in Mechanical Engineering
- Strong CAD skills (e.g. SolidWorks, Fusion)
- Experience in building functional prototypes (not just design)
- Ability to take a product from idea to a working MVP
- Willingness to take ownership of the technical development
- Interest in building the technical side from the ground up
- Hands-on mindset, fast iteration, pragmatic approach
- Languages: German preferred, English required, Italian a plus

## Your Tasks

- Prototyping and building functional solutions
- 3D printing and rapid iteration of components
- Working with mechanical components, seals, and fixation mechanisms
- Working with gas, gas flow, and potentially high-pressure components
- Running simulations when needed (e.g. gas flow, Ansys)
- Sourcing, testing, and selecting components for prototyping
- Advancing the product towards scalable production (e.g. CNC, injection molding)

## What Holevio Offers

- Co-founder role with clear responsibility for the technical development
- Equity (vesting, no compensation in the early stage)
- Opportunity to take on long-term technical leadership (CTO)
- Founding member of Holevio
- Direct collaboration on the product with a strong focus on execution
- Access to the NOI network
- Opportunity to help build the Holevio team from day one
- Flexible collaboration (remote / part-time / full-time by agreement)
- Opportunity to build a product from 0 to market readiness and actively shape it
