

Who we are.

Symphonie Prime Group is a stimulating and ever-changing reality that centralizes corporate functions such as business development, human resources and administration, whereas our delivery companies are primarily focused on IT Consulting and Digital Transformation for final clients. Symphonie Prime combines various cultures, habits and identities to create a unique inclusive environment. We are all inspired by passion and work together to achieve the same goal: innovation!

Web Developer

As a Web Developer, you will work on a variety of client projects from WordPress to fully functional API and frontend projects made from scratch, solving problems, working in a passionate team, helping each other respecting the deadlines.

What you'll do as a Web Developer:

- Collaborate with the project manager and senior developers to articulate the best technological solution for the problem at hand;
- Manage yourself to make sure you can deliver on time, on budget and on scope;
- Write high quality code with readability, efficiency and maintainability in mind;
- Develop and maintain complex PHP applications;
- Implement complex features using modern PHP code and patterns.

Requirements:

- General understanding of web development processes and tools;
- Experience working with third party APIs;
- WordPress experience;
- Eagerness to learn new languages and technologies;
- PHP/MySQL experience working with WordPress;
- Good knowledge of asynchronous calls, partial page refreshes and AJAX.
- Knowledge of either React or Bootstrap.

Nice to Have:

- Experience with GIT and GIT-based workflows;
- Ability to write Regex by hand;
- Experience with Plugin/Theme development.

Our Mindset

The people who work with us are not just "employees", **they are talents who contribute, each in their own field, to the creation of a place without spatial and mental boundaries, where aspirations, goals, enthusiasms and strategies come together in a virtuous path of shared evolution**, to grow and express their full potential.
